Test-Formular <http://www.waldhessenkiter.de/kontakt02.html>

Evanzo Server: <https://sh2053.evanzo-server.de>:

The screenshot shows the Plesk control panel interface. At the top, there's a dark header with the 'Plesk' logo and several icons (user, globe, help, search). Below this is a light blue navigation bar with a 'Menü' link and a hamburger menu icon. The main content area has a breadcrumb trail 'Websites & Domains > waldhessenkiter.de >'. The title of the page is 'PHP-Einstellungen für waldhessenkiter.de', with a link 'Eine Ebene höher' to the right. The text explains that placeholders like {DOCUMENT_ROOT}, {WEBSPACERoot}, and {TMP} can be used in parameter values. It also states the current PHP version is 5.3. There are two sections: 'Leistungseinstellungen' (Performance settings) and 'Allgemeine Einstellungen' (General settings). The first section lists memory_limit, max_execution_time, max_input_time, post_max_size, and upload_max_filesize, all set to 'Standard'. The second section lists safe_mode (off), safe_mode_include_dir, safe_mode_exec_dir, include_path, session.save_path, mail.force_extra_parameters, register_globals, open_basedir (set to {WEBSPACERoot}/{}/{TMP}/{/}), error_reporting, display_errors, log_errors, allow_url_fopen, file_uploads, short_open_tag, and magic_quotes_gpc, all set to 'Standard'. At the bottom, there's a note '* Erforderliche Felder' (Required fields) and two buttons: 'OK' and 'Abbrechen' (Cancel).

PHP-Einstellungen für waldhessenkiter.de

[Eine Ebene höher](#)

Sie können in den Parameterwerten folgende Platzhalter verwenden:

- {DOCUMENT_ROOT} für das Basisverzeichnis dieser Website.
- {WEBSPACERoot} für das Basisverzeichnis eines Webspace, in dem sich diese Website befindet.
- {TMP} für das Verzeichnis, welches temporäre Dateien speichert.

Ihre PHP-Version ist 5.3.
